

Freedom III™

Sleek look. Easy to operate – No latches to unlock.

12V Power Model The Freedom is available with a 12 volt motor for push-button convenience. Shown (top right) is the Freedom III motor. Notice the manual crank override in case of power loss.

Manual Crank Model The Freedom is also available as a manually operated awning.

Combine a Freedom III & a Truckin' Awn to get total coverage for your truck camper.

See page 12 for this truck camper companion awning.

Carefree's Freedom III opens and unfolds as you turn the hand crank or push a button (12 volt models only). The awning arms fold out of the lead bar once it's at eye level and within easy reach. The arms adjust easily with flip lock controls. To close, just crank in the opposite direction – or simply push a button on the motorized awning; the awning case closes and locks automatically. The 12V model includes a manual override if power is lost.

Full or partial extension If you don't have the space to crank your Freedom III awning out to full extension, you can stop at any point, unfold the legs and secure them.

Warranty: "Two Year Limited" – Two years 100% parts, labor and freight on all components.
